

VET-DESIGN

Expert designer in equine dentistry

CATALOGUE

VET-DESIGN, expert designer in equine dentistry, is always looking for excellence and never stops developing new products dedicated to the dental care of horses. **Handy** and **light**, our professional equine dentistry equipment provides practitioners with **good working comfort**.

From the concept to the manufacturing, all the steps are made in our premises located in Saint-Gilles, France.

We are an enthusiastic team, driven by the search for solutions to improve the materials and practices on a daily basis. A simple idea can, thanks to you and us, facilitate the practice of thousands of practitioners!

One of our main strengths is being able to guide you efficiently in the choice of equipment, according to your specific needs.

We collaborate with various renowned practitioners to develop new materials. Some companies also call upon VET-DESIGN for sourcing and development.

In a few words : **passion**, **excellence**, **flexibility** and **innovation** are VET-DESIGN's main values.

POWER INSTRUMENTS

FLEXA RANGE

VET-DESIGN offers a range of high quality professional equipment : **LIGHTWEIGHT**, **RELIABLE** and **ULTRA-FUNCTIONAL** products. Burrs are available in various grains, diameters, shapes and sizes depending on the specific needs.

All burrs are made of stainless steel and coated with diamond chips.
Diamond burrs are made in France.

Types of grains available :

Grain 427 : very fine grain - **Grain 600** : fine grain

Grain 852 : medium grain - **Grain 1001** : coarse grain

We also offer a large choice of power equipment sets. Discover them all in the dedicated section of this catalogue !

The FLEXA power instruments are operated with a **drive cable** :

FULL AUTONOMY : daily practice, up to 20 horses a day

COMPATIBILITY : connectivity adapted to other brands

WIRELESS : freedom of movement

SAFETY : automatic safety shutdown in case of overload

COMFORT : ergonomic belt holding the motor & battery

MULTIBRAND COMPATIBILITY

Benefit from the innovative know-how of VET-DESIGN products and the flexibility of choice : If you are already equipped, our range also adapts to your needs in terms of connectivity. You can now freely renew a motor, a drive cable and complete your dental burrs !

Discover the FLEXA VET-DESIGN series compatible with HDE products, and FLEXA FOREDOM series compatible with the Keydrive system.

Multibrand after-sales service :

Do you have maintenance or repair needs ? Vet-Design is competent to offer an adapted, fast and efficient service. We offer a multibrand repair service in **48 to 72 hours**.

POWER INSTRUMENTS

MOTOR SET
MOTV_MVDF

Battery with pouch

MOTV_BMVD

High capacity lithium-ion battery
(10.2 A.H) Weight : 1.2kg

Allowing an intensive practice
of about 20 horses a day

Battery charger

MOTV_CB25VVD

With end of charge indicator

Battery/motor cables

MOTV_CMBF

Belt

ACC_CMVDF

- Waist adjustment
- Machine washable
- Easily removable battery pouch

Motor

MOTV_MSVD

- 6 speeds motor (from 2500 to 7000 rpm)
- Bi-directional rotation
- 3 control buttons (ON / + / -)
- Compact (140*85*50 mm)
- Total weight : 0.7kg
- 25V low voltage motor
- Automatic safety shutdown in case of overload

- Compatibility with European brand connector
- Length : **1m** (FLEXV_F100VD) or **1.2m** (FLEXV_F120VD)
- Reinforced
- High quality stainless steel
- Quick-release system
- Without clip

VET DISC

VET DISC is an ergonomic motorized profiling instrument perfectly adapted to the levelling of overgrowths as well as for routine profiling. The head is patented with its specific shape for easy access to the bottom of the mouth. Thanks to its long and compact head, VET DISC is specifically designed to facilitate the work of the practitioner.

ADVANTAGES

This innovative product, designed and manufactured in France, has many benefits since it combines **thinness**, **lightweight** and **robustness**.

- **Low head height**, for easy access to the bottom of the mouth
- Specific design of the head for better profiling
- **Lightweight**, easy handling
- **Removable & interchangeable** disc by practitioner
- **No daily maintenance**
- Facilitated cleaning and excellent grip of the **blue polymer (POM)** handle
- Delivered with diamond disc grain 852 (DIAV_DD852).
Diamond disc grain 1001 available on request (DIAV_DD1001).

SPECIFICATIONS

- Low head height : **21.5mm**
- **4-position** rotary head
- **Curved** or **straight** profiling shaft
- Waterproof disc and connectors
- Total weight from **595g** to **645g** (POM handle lighter than rubber)
- Your choice : POM handle or rubber grip handle

Long curved VET DISC, blue polymer handle

SFV_GVDCPP

Weight : **595g**

Total length : **56cm**

Long straight VET DISC, blue polymer handle

SFV_GVDDPP

Weight : **595g**

Total length : **56cm**

Long curved VET DISC, rubber grip handle*

SFV_GVDC

Weight : **645g**

Total length : **56cm**

**Rubber grip handle available on request for all handpieces*

Short VET DISC, stainless steel handle

SFV_CVD

Weight : **300g**

Total length : **18cm**

VET SWITCH

VET SWITCH is an ergonomic motorized profiling instrument. Its versatile head allows working on diastemas and caries. It also enables a good finishing work on the overteeth and an optimal bit-seat profiling, very important for the comfort and performance of horses.

*Patent pending

ADVANTAGES

- A wide range of diamond burrs available in **various shapes & diameters**
- Small size head for an **efficient work**
- **Lightweight**, easy handling
- Bi-directional to facilitate profiling
- **No daily maintenance**
- Facilitated cleaning and excellent grip of the **blue polymer (POM)** handle

SPECIFICATIONS

- Sold w/o burr, to be ordered separately
- Head dimensions : **Ø21** / Height **26.4 mm** (w/o burr)
- **Straight** profiling shaft (**curved** available on request)
- Total weight incl. apple-core burr (**Ø19**): **550g** to **600g**
(POM handle lighter than rubber)
- Waterproof head and connectors
- Your choice : POM handle or rubber grip handle

Long straight VET SWITCH, blue polymer handle

SFV_GVSDPP

Total Weight : **550g**

Total length : **55cm**

Long curved VET SWITCH, blue polymer handle

SFV_GVSCPP

Total Weight : **550g**

Total length : **55cm**

Long curved VET SWITCH, rubber grip handle*

SFV_GVSC (curved) / SFV_GVSD (straight)

Total Weight : **447g**

Total length : **33cm**

**Rubber grip handle available on request for all handpieces*

Medium VET SWITCH, blue polymer handle

SFV_MVSPP

Total weight with burr: **447g**

Total length : **33cm**

Short VET SWITCH, stainless steel handle

SFV_CVS

Total weight with burr: **300g**

Total length : **17cm**

Apple-core burrs for VET SWITCH

DIAV_B13D

Dome-shaped apple-core
diamond burr Ø13

DIAV_BMBD

Dome-shaped apple-core
diamond burr Ø19

DIAV_BMCD

Apple-core diamond burr
for grinding canine teeth Ø19

DIAV_BMD

Medium apple-core
diamond burr Ø19

Diastema burrs for VET SWITCH

DIAV_DL32

Diamond coated cylindrical
diastema burr Ø4 / length: 32mm

DIAV_DL17

Diamond coated cylindrical
diastema burr Ø4 / length: 17mm

All burrs are made of stainless steel and coated with diamond chips.

Diamond burrs are made in France.

Depending on the desired use, our short burrs are available in :

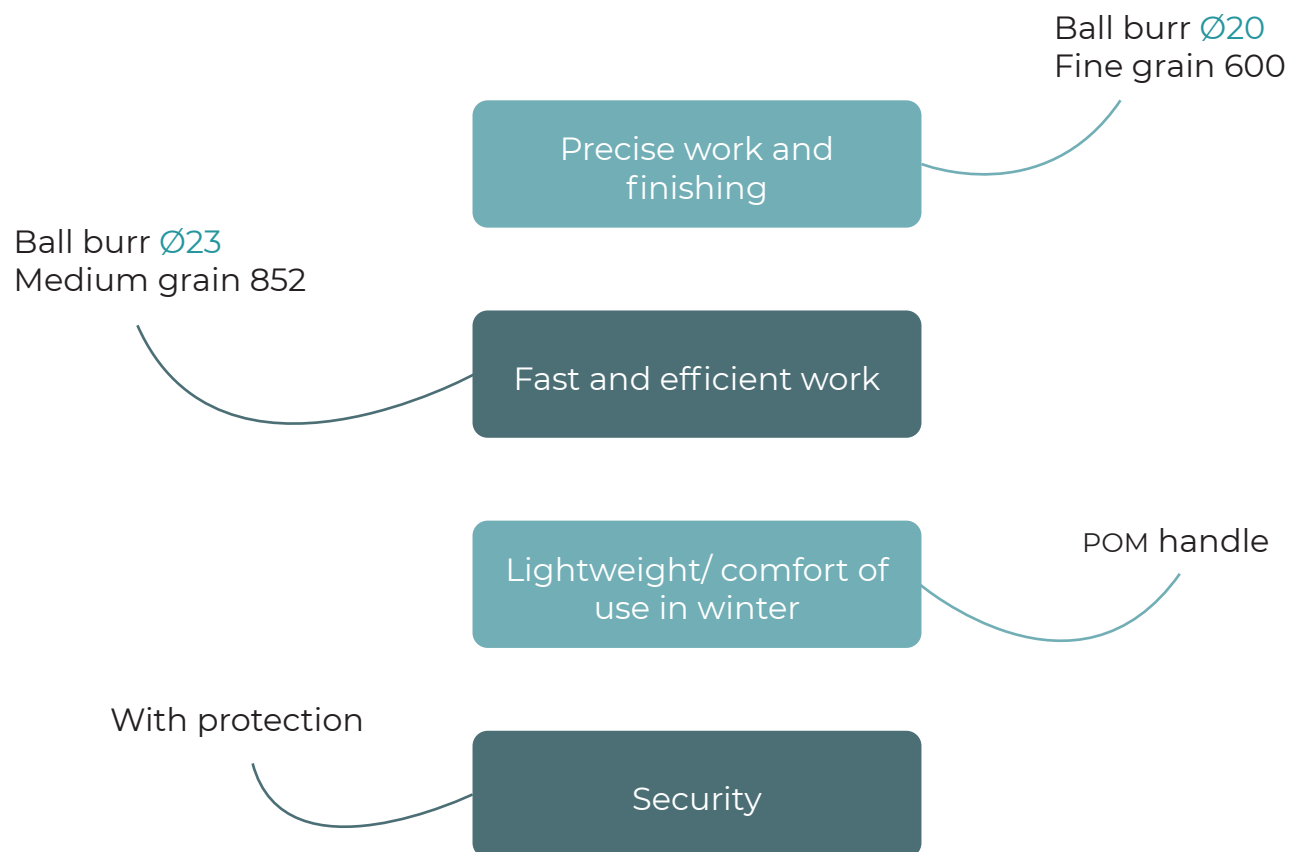

- Various shapes (ball, incisor disc, tooth sockets burr)
- Various diameters
- Types of grains available :
 - Grain 427** : very fine grain - **Grain 600** : fine grain
 - Grain 852** : medium grain - **Grain 1001** : coarse grain
- Two types of handles available : stainless steel or blue polymer handle (POM). Note that the polymer handle is lighter and also less cold in winter !

BALL BURR HANDPIECE

The Ball burr handpiece is a very usefull instrument in equine dentistry, allowing easy profiling of the bit-seat. The ball burr handpiece developed by Vet-Design offers **ergonomics, safety** and **adaptability** according to your specific needs, as it is available in various diameters and diamond abrasive coatings.

OUR ADVICE

SPECIFICATIONS

- Total length : **17cm**
- Bi-directional rotation
- Ball diameters available : **Ø20** and **Ø23**
- Weight from **139g** (POM **Ø20**) to **256g** (stainless steel **Ø23**)
- With or without protection
- Fine grain 600 & medium grain 852 available
- Your choice : Pom handle or stainless steel

INCISOR DISC HANDPIECE

The incisor disc handpiece allows an accurate work on over-long incisors and is ideal for correcting incisor abnormalities. This handpiece offers ergonomics, safety and adaptability according to your specific needs.

ADVANTAGES

- Guard protecting the palate (protection)
- Two **interchangeable** diamond discs :
 - A **thinner disc** (1.9 mm), with diamond around the disc, **grain 427**, perfectly suited for cutting the incisors.
 - A **thicker disc** (3 mm), with diamond above and below, **grain 600**, fitted to file the incisors.

DIAV_DDIL600
Thickness : 3mm
Diameter : 53mm

DIAV_DDICC427
Thickness : 1.9mm
Diameter : 53mm

SPECIFICATIONS

- Stainless steel or blue polymer (POM) handle
- Total length : **15cm**
- Delivered with the **3mm** disc (DIAV_DDIL600)
- Total weight from **220g** (POM) to **320g** (Stainless steel)

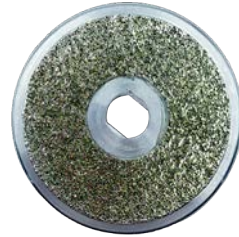

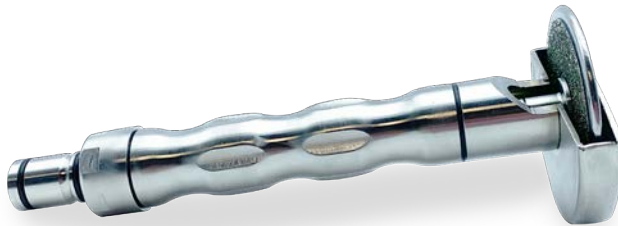

Incisor disc handpiece

Grain 600

SFV_FICI **stainless steel** handle/ SFV_FICP **blue polymer** handle

Weight : **320g** (stainless steel) / **220g** (POM)

Total length : **15cm**

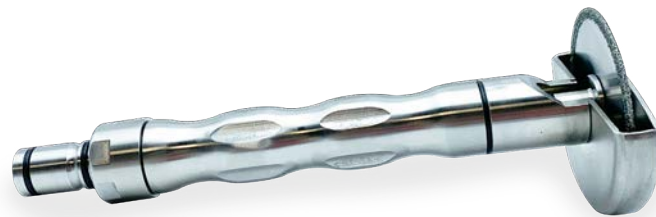

Incisor cutting disc handpiece

Grain 600

SFV_FIDCCI **stainless steel** handle/ SFV_FIDCCP **blue polymer** handle

Weight : **320g** (stainless steel) / **220g** (Pom)

Total length : **15cm**

TOOTH SOCKETS BURR HANDPIECE

The tooth sockets burr handpiece is ideal for a perfect finish following a wolf tooth removal. This handpiece developed by Vet-Design offers ergonomics, safety and adaptability according to your specific needs.

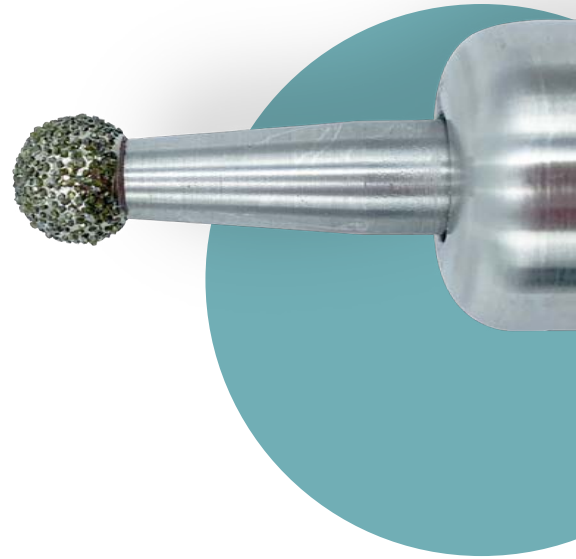

ADVANTAGES

- Fine grain for a **perfect finish**
- **Ergonomic handle**, good grip
- Bi-directional rotation

SPECIFICATIONS

- Diameters available : **Ø9** et **Ø11**
- **Grain 600**
- Total weight from **130g** (Pom) to **220g** (Stainless steel)
- Total length : **18cm**
- Stainless steel or blue polymer handle (POM)

PLATES

CLASSIC

Pony plates

OB_PCP

Incisor plates

OB_PIC

Specifically designed for safe work on incisors.

INCISOR

Juliuster

OB_JXRS

Easy-to-use device to offset the lower jaw to the left or right for open-mouth views with offset-technique. Great to investigate the roots and the occlusion surface of the cheek teeth. Dorso-ventral views can be made with 5 cm offset to the left and right.

X-Ray plates solution

OB_PXRS

They are intended for taking intraoral X-rays radiographs of the incisors without any material in the way and without any trouble to handle. Durable radiolucent material has been tested according to the official DAkKS-DKD-R 3-3 regulation and can withstand 5,13 KN / 513 Kg pressure.

STOMATOLOGY

SET

Wolf Tooth extraction set

STO_SEDL1

Wolf tooth extraction set with 5 elevators, 3 forceps, one scaler, and stainless steel instrument box

ELEVATORS

Premium set of 6 stainless steel elevators

STO_S6EIVD

Premium quality (Made in France). Delivered with 6 handles in an instruments box.

Set of 6 interchangeable stainless steel elevators

STO_SEI5I

Delivered with 2 handles (Import quality)

Curved elevators

STO_ECD

STO_ECG

STO_ECL5

Stainless steel mallet 18cm

STO_MI

- Length : **18cm**
- **Ø4,5cm**
- Weight : **1kg**

Stainless steel mallet 19cm

STO_MI19D3

- Length : **19cm**
- **Ø3cm**
- Weight : **0.54kg**

FORCEPS

45° Forceps, closed, 20 cm

DAV_D45BF20

Its 45° curved head makes easier the wolf tooth extraction without being bothered by soft tissue. Closed nose. Stainless steel quality.

45° Forceps, open, 20 cm

DAV_D45BO20

Its 45° curved head makes easier the wolf tooth extraction without being bothered by soft tissue. Open nose. Stainless steel quality.

90° Forceps, closed, 20 cm

DAV_D90BF20

90° curved head, closed nose. Stainless steel quality.

90° Forceps, open, 20 cm

DAV_D90BO20

90° curved head, open nose. Stainless steel quality.

Double-bended forceps, open, 20 cm

DAV_DCCBO20

Dual-articulation forceps, 26 cm

DAV_DDC26

BONE CURETTES

Bone curette Ø6mm

STO_CD6

Bone curette Ø8mm

STO_CD8

GOUGE FORCEPS

Gouge forceps

STO_PGC

The 45° inclination makes it easier to reach the mucous membranes, without being hindered either by the lips or by the branches of the mouth-opener.

Straight gouge forceps with dual-articulation

STO_PGDA

Curved gouge forceps with dual-articulation

STO_PGDAC

BURGESS

Burgess set with closed inserts

STO_KBF

Burgess set including 4 **closed inserts** (6/8/10/12mm), one handle, one curved extension, one straight extension, 2 rods and an instrument pouch.

Burgess set with open inserts

STO_KBO

Burgess set including 4 **open inserts** (6/8/10/12mm), one handle, one curved extension, one straight extension, 2 rods and an instrument pouch.

Molar spreader

DAV_DEID

The forceps mobilise the molar to be extracted by taking support on the adjacent .
Specifically designed to keep most of the pressure on the tooth designated for extraction.
Stainless steel quality.

Screw model molar forceps

DAV_DMAV

4 roots molar forceps

DAV_DMAP

Length **48.5cm**

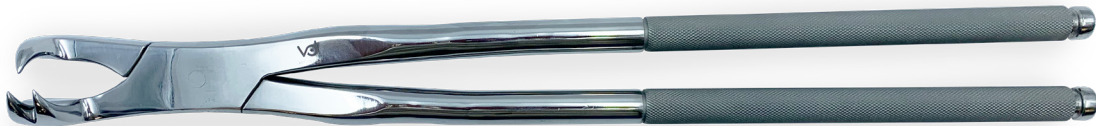

3 roots molar forceps (left)

The grip is made on 3 points and perfectly fits the fragment when it is broken into a triangular shape. The side with the 2 points is placed in the hollow of the tooth on the left or right side (depending on the forceps) and the third is positioned on the fragmented part.

DAV_DM3PG

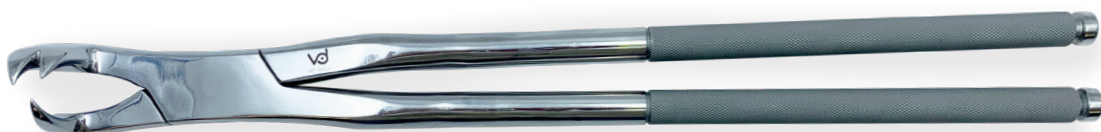

Length **48.5cm**

3 roots molar forceps (right)

DAV_DM3PD

Length **48.5cm**

FRAGMENT FORCEPS

A long nose forceps for small molar fragments. The diameter and length of the nose allows to grasp and remove the fragments very easily.

Long nose fragment forceps (2cm).

DAV_DFLN2

Length **55cm**

Long nose fragment forceps (3cm)

DAV_DFLN3

Length **55cm**

Long nose fragment forceps (5cm)

DAV_DFLN5

Length **55cm**

Duck bill forceps

DAV_DBC

Long nose forceps with a specific angle.

Total length **55cm**

Nose length **6cm**

Fulcrum set of 8 nylon pieces

ACC_FS8PN

ALLIGATOR FORCEPS

Stainless steel alligator forceps with 90 degree tip and scissor handle.

90° Alligator forceps, length 30cm

STO_PA3090

90° Alligator forceps, length 40cm

STO_PA4090

Incisor extraction set

STO_SEI

Incisor extraction set including: ergonomic incisor forceps (28 cm), flat elevator, mallet, straight elevator and 4 gouges (to hit).

Incisor spreader

DAV_DEIDI

The forceps mobilise the incisor to be extracted by taking support on the adjacent incisors. Specifically designed to keep most of the pressure on the tooth designated for extraction. Stainless steel quality.

Incisor forceps, 28 cm

DAV_DEI28

Suitable for incisor's extraction.
